What are we trying to solve?

No centralization of medical records.

Eliminate physical records

To simplify consultations

Revolutionizing Healthcare! - The right way

Our Solution - My MedRec

My MedRec is a DigiLocker online application that **enables you to store all your Personal Health Records (PHR) in a secure cloud.** Say bye-bye to lugging around a huge patient file to your doctor's office, go digital with our technology.

Why should you use My MedRec?

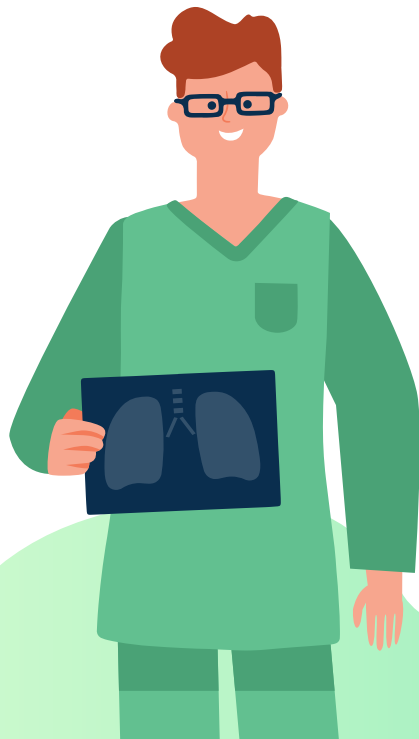

1. Easy Signup
 - Create an account with us in a click of a button
2. Browse medical history
 - Browse all of your existing medical records
3. Unlimited storage
 - All your medical records are securely stored on the cloud
4. Print Ready
 - Getting a hardcopy of your document is just a tap away
5. End to end encryption
 - All of your health records are encrypted by a unique QR code generated for each patient.
 - Your doctor can view your records only once you authenticate access via a link that will be sent to you

Future enhancements

Linking family health records

Incorporating ML concepts to suggest doctors based on the patients' ailments.

An additional Face id/
fingerprint recognition for
faster login

Thank you

Do you have any
